

Updates on Student Profiling and Support at TVET Colleges in South Africa
www.learnerprofiler.info

The Year 2022 Will Be Different!

Colleges are set to welcome several interesting innovations

In our last communication we spoke about innovations that will bring about improved student support in TVET Colleges in 2022. These innovations will also ensure that various departments in TVET Colleges now converge around one system to support students. This will indeed make student support everyone's business!

TVET Colleges are now able to solve several issues facing students. The core driver to many student challenges are of course the the Student Profiler Web-Based System. Colleges in 2022 will use this system for:

- **Career Guidance** - before students enter college via your college website;
- To do **Placement Tests**: Finance, Literacy and Numeracy;
- To do **EXIT Screening**;
- To screen for **Disability** in various languages;
- To offer **Maths & Study Skills support** for students via technology e.g. cellphones, desktops, laptops and Tablets;
- To do **Annual Campus Life Experience Surveys**;
- To **track Alumni** using technology;
- To **track students in the workplace or internships** etc.

Believe it!

They Said It Could Not Be Done!

Did you know that close to 98% of students at colleges using *The Student Profiler System* used either a cellphone (70%) or desktop (28%) device to apply online and to complete a Profiler Placement Test

Thousands Tested Remotely

**And More Innovation is Coming in
2022!**

**What is the Student
Profiler?**
